

Ideas to brighten up your gardens, back yards or balconies

# Tin can planters

Give them a wash after you've emptied them and make sure there are no sharp edges. Get your grown up to rub them down with glass paper

You need to put a drainage hole in the bottom of your tins. This is definitely a job for a grown up

The easiest way is to get a hammer and big nail. Put the nail point side down and hit the flat end with the hammer to puncture the tin

Now you can paint your cans any way you want

You can use any kind of paint ,but if you want the paint to last put a coat of acrylic varnish over the paint after it has dried

You can decorate them however you like

And fill them with plants and flowers
